Basic Rule for Response scanner information

MyId

The system, department, site and channel on Full Database have MyId.

The system, department, site and channel copied from full database have MyId.

But system, department, site and channel which user created don't have MyId.

MyId relates RadioReference ID.

ID is shown xxId=xx.

e.x.

CountyId=5

AgencyId=15

ID list

HPDB ID	description	RRDB ID
CountyId	Conventional System (County)	ctid
AgencyId	Conventional System (Agency)	aid
TrunkId	Trunked System	sid
CGroupId	Conventional Department	scid
CFreqId	Conventional Frequency	fid
SiteId	Trunked Site	siteId
TGroupId	Trunked Department	tgCid
Tid	Trunked Channel	tgId

Note :

Search with Scan doesn't have MyId.

Index

The index will be used, when you hold or avoid system, department and channel.

It is decided when data is downloaded to RAM. It is invalid if DB_Counter differs.
